Linkage analysis between murine transmissible venereal tumor (TVT) and the MHC in an inbred H-2a strain of mouse was performed. The MHC was assigned to the major histocompatibility complex (MHC) by marker analysis. Twelve microsatellite markers situated on the distal half of chromosome 1 were used to establish linkage between TVT and MHC. All twelve microsatellite markers tested were positive for linkage with TVT, and three markers gave the highest lod scores. The highest lod score, 4.5, was obtained at ata = 0.05. The pattern of recombination was also examined for two MHC-linked genes, Rf1 and Ea, in a series of backcross matings, and they were clearly linked to TVT. These results indicated that TVT is located near the H-2 region.Q: Sql data type datetime error I have a table with a field of type date and datetime.
