

```
ArduiDroid Lite - Blink.ino
1 //
2 // Blink
3 // Turns on an LED on for one second, then off for one second, repeatedly.
4 //
5 // This example code is in the public domain.
6 //
7 //
8 // Pin 13 has an LED connected on most Arduino boards.
9 // give it a name:
10 int led = 13;
11
12 // the setup routine runs once when you press reset:
13 void setup() {
14 // initialize the digital pin as an output.
15 pinMode(led, OUTPUT);
16 }
17
18 // the loop routine runs over and over again forever:
19 void loop() {
20 digitalWrite(led, HIGH); // turn the LED on (HIGH is the voltage level)
21 delay(1000); // wait for a second
22 digitalWrite(led, LOW); // turn the LED off by making the voltage LOW
23 delay(1000); // wait for a second
24 }
```
