Q: how to add or update column value into Excel using OLEDB? How to add a column's value into an Excel using OLEDB? using (OleDbCommand cmd = new OleDbCommand()) { cmd.Connection = conn; conn.Open(); cmd.CommandText = "INSERT INTO [C:\Users\vivian\Downloads\Excel\Parkslst.xlsx] ("ID","ParkID","Name","status","price","description","project") VALUES("vivian.c.park1.id","vivian.c.park1.id","vivian.c.park1.name","vivian.c.park1.status","vivian.c.park1.price","vivian.c.park1.description","vivian.c.park1.project)"; cmd.ExecuteNonQuery(); } Error Message: Could not find an entry in the table that matches the specified parameters. A: It is not possible to insert into an XLSX file using OleDb as it is a binary file format. You will need to work with an XLS file. Also, you can't do this as you are trying to do as using a string parameter. There is no way to bind that string value to a OleDbCommand. You need to bind a OleDbParameter with the OleDbType.Binary and a value that would store the string as a binary data. A quick way to add a value to an Excel file is using the Interop.Excel library that you can find here: It allows you to create new or to modify values of existing cells of an
