Genomic stability is the result of many and elaborate mechanisms to detect DNA damage and then to repair it. However, continuous DNA damage accumulation can eventually lead to genomic instability and cancer. In the past decades, many proteins involved in DNA damage response (DDR) have been identified and characterized. Of particular interest are the proteins that specifically recognize and process damaged DNA and histones. This mini-review will focus on the recent progress in DNA damage response and the relationship between DDR and DNA repair mechanisms.William Molesworth (Australian politician) William Molesworth (c.1831 – 4 January 1908) was a timber merchant and politician in the early days of the colony of South Australia. History Molesworth, born in Great Yarmouth, Norfolk, England, emigrated to South Australia in 1852 and soon established a successful timber business. He was a prominent Liberal Party member in the early days of the colony and held the electoral district of Sturt, St. Peters and Yorke's Peninsula in its representation in the South Australian House of Assembly for nine years, from April 1858 to December 1867, and for five years from March 1875 to February 1879. He was also active in the South Australian Colonial Architect's department and contributed to the construction of several Government buildings in Adelaide, including the Parliament House, the Court House, and the Royal Mail Hotel, now the Grand Hotel. He was appointed by the colonial government to the Board of Education. Family He married Sarah Emma Robinson (c. 1832 – 2d92ce491b
