@freewind - I've not yet looked at the syntax in

---

detail, but can you provide a simple example of how you would use the program? When it's called with no arguments will it just append all PDF files in a directory to one? Is there a way to limit to a certain number of pages before it stops? I can see a GUI being a bit of a pain - it must be possible to operate in the command line. In that case, I assume it accepts the same list of options you described? I think you're right - just found it a bit hard to get it to do what it says - mostly because the GUI threw up errors and told me to see a PDF help file (where I promptly found the same instructions on the website as above!), but not enough information and not enough clues about

---

how to combine the various flags. I'll give it another go. Gavleen - there are no undocumented features - the help file provides all possible command line examples and clarifies any errors or issues that you may have. It is more than likely that you cannot achieve what you want to do with the software, but if so, the help file should come to your aid and clarify what is possible. Hello. I've used that on two PDF documents of 12,000 pages each. In both 09e8f5149f

- Append PDF takes a list of PDF documents and adds them to one output PDF,.
- The input PDFs must not be in a PDF form with encryption enabled. Otherwise, Append PDF will not be able to decrypt the PDFs.
- Append PDF will NOT update the time, date and page numbers of the PDF files.
- Append PDF appends all files in the order they are listed, even if the PDF files are different sizes

PDF Size optimization is up to 50% better than appending files in Acrobat and using other tools that use Acrobat to append. Append PDF will also keep the bookmark
