However, if you wish to use this driver it should be installed and working with your printer. Our Printer Driver Download page contains a vast number of printer drivers

What's New In?

Click-N-Ship for Business is an easy to use, yet powerful add-on to DPS Mail Manager, that allows you to create labels and print shipping label forms. The reports that are created for each shipment are saved with the shipments and can be downloaded to Microsoft Excel. Focusing on the optimization of your time-consumption, Click-N-Ship for Business includes optional online services that are included at no charge. These online services, as well as the title itself, allows you to monitor your shipments and print labels from a web browser. The online services include tracking tools that make tracking your shipments easy and convenient. The online services also include a complete USPS Customer Service Center, as well as a knowledge base. Furthermore, the web browser based service allows you to print labels and forms. You can print labels for multiple shipments or print single forms by name, so you can have the label that fits your order. One of the most convenient features is the capability to be able to scan the item and print the label directly from your ScanSnap using the Click-N-Ship for Business software. The software prints the label and the exact postmark in two clicks and you can send the label directly to USPS without printing the label. The system allows you to track multiple shipments and monitor their status and arrival dates, even when you are not available to log in to your mail service provider. You can even print labels with a laser printer, without having to print the labels manually. All the information about the tracking status

is shown in a simple and easy to read manner. What's New in Version 2.3.3.5: - Some improvements to the application start-up screen. What's New in Version 2.3.2.4: - A number of improvements to the application start-up screen. What's New in Version 2.3.2.3: - Some bug fixes.
