We write here about the problems that can occur in AutoCAD. We want to keep you safe from the misuse of your personal files and your AutoCAD account. We provide pointers on how to recover your files and your AutoCAD account. Reclaiming files We assume that you have already logged into your AutoCAD account using an account set-up code. You have logged into your AutoCAD account at least once before you proceed with the following steps. Logging into your AutoCAD account will also open a file. First, we advise that you backup all files and data on your PC in case you are in doubt about how to do this. You can do this by using the BACKUP button in the Windows Start menu or by using a utility that is specific to your PC (for example, backup on MAC by using Time Machine). See if it is possible to restore files that you have backed up. Next, if you are using a new PC or have not backed up your files, we advise that you stop your AutoCAD application. Open the Control Panel and under Performance and Maintenance, click the Services tab. Click on the highlighted service and on the details, click Disable. If your PC was not backed up, this will restore the operating system to a previous version. If it was, it will also disable the system service of AutoCAD to prevent it from starting. Close all open files or windows. Using the file manager, you can recover your AutoCAD files and folders by using the Save As option. The location depends on your operating system. For Windows, navigate to your AutoCAD folder, which is usually in C:\Program Files\AutoCAD or C:\Program Files (x86)\AutoCAD. This is usually the Windows System drive, also known as the C: drive. From there, open the file My Documents. AutoCAD makes a subfolder called AutoCAD which contains all AutoCAD files. Open the folder. If you see files and folders with.DWG or.DWF extension, you can save them on your PC. To open these files and folders, on your Windows PC, navigate to your AutoCAD folder. In Windows Explorer, the path is C:\Program Files\AutoCAD or C:\Program Files (x86)\AutoCAD. At the top of the Windows Explorer window, click on the

Cara Designer AutoCAD Architecture 2012 was first introduced with a new collaborative tool, Cara Designer. Cara Designer is a drawing-viewing client that is installed on the computer of the architect and/or engineer. Once the project is shared with the Cara Designer Client, an AutoCAD DWG file is automatically copied to the Cara Designer Client, which is then synchronized with the AutoCAD drawing through the embedded browser. This enables the users to view, comment, and edit the AutoCAD drawings on their own computers with ease and convenience. AutoCAD Architecture 2012 also adds Cara Architect Viewer, which is a web-based and browser-based AutoCAD viewer. It can work on any operating system such as Windows, macOS, and Linux.
