## DuckieTV Download X64

DuckieTV is a customizable TV series calendar that keeps track of the films users are interested in. The application integrates with various torrent clients and provides you with information retrieved from the TVDB open database. A great tool for movies fans The application is useful to film aficionados that watch multiple TV shows on a regular basis. This program will allow them to keep up-to-date with the latest TV and torrents releases. Given the fact that it can search various torrents sites, all you need to do is type the name of the series and hit the Search button. DuckieTV comes with a beautiful movie-themed background that updates itself based on the chosen TV series. Navigation is very smooth and is performed exclusively via side buttons. The program does not feature any menus or classical tabs, which means newcomers will find the GUI very intuitive. Streamlined for a smooth and problem-free user experience The application requires very little configuration work in order to run. Essentially, users only have to define the TV shows that are to be tracked, and the software does the rest. If more advanced features are to be used, several preferences can be tweaked, in order to better suit users' needs. With DuckieTV, users can add shows from an automatically populated trending list. This is one of the great features of this program, as users can even employ it in order to test new shows. Rich details, like starring actors, duration and genre are displayed for each item. The calendar tracks the shows selected by users Once one or multiple items have been loaded, the calendar will track the episodes and display future air dates, as well as any other relevant data. A built-in search function allows users to query the most important torrent engines for new episodes. In conclusion, DuckieTV is a comprehensive TV shows tracker that allows users to keep up to date with the latest genre releases.
