\$this->facebook->api('/me','GET'); I use below PHP sdk So how to get user ID of user from that facebook page? I need to use that data to get information from facebook. A: This is how to get it: \$user = \$this->facebook->api('/page_id/accounts/'.\$page_id.'?fields=id,name,link&access_token='.\$access_token, 'GET'); Q: How to parse multiple jacoco code coverage results for one class using SonarQube I'm using SonarQube 5.2 to analyze some code. SonarQube provides a simple way to add a single jacoco code coverage result file to a SonarQube project

via sonar-jacoco-plugin. I'm looking for a simple way to add multiple jacoco code coverage results for a single class (or even a whole SonarQube project), similar to how the jacoco-maven-plugin supports jacoco coverage results for multiple source files in a single Maven build. When I attempt to use the sonar-jacoco-plugin to generate a single coverage report, it only works for one class (or a project). This is not an option for us. For example, if we are analyzing one class that has 50 methods, and we need to show which lines are covered (as opposed to which methods) that would be an impossible task.

One option is to use sonar-maven-plugin with each of the sources that we need to analyze. We don't want to do that either. The problem is that the results get interleaved from all the sources. If we generate a single coverage report, it includes the aggregate of
