Even though the clipboard is not an independent app, it's more of a system function; some tools can interfere and change the clipboard's functionality, for the better. For example, MagicCopyPaster Cracked Version is a smart app that tweaks the clipboard and can give you a helping hand. Simple and compact interface The UI is a simple list with an editing space glued to it. If you want to clean up the list or save it, the three buttons at the bottom are there to help. Also, inside the "Options" menu you can find means to change the color of the font, a deactivation switch and the option to start the app with the system. Keep in mind that the app can only store text data. Apps or other items are not going to be displayed if selected. Anything that doesn't resemble text is ignored and slipped by the tool Store an unlimited number of clipboard elements MagicCopyPaster Crack For Windows has no limit regarding how many items you can upload to it. If the number exceeds the UI size, a scrollable button will be generated. An order number will be designated for every element. For the first ten items, a hotkey is in place, to enhance the speed of the process. Remembering the hotkeys is not an issue as they are linked to the order number. For example, the first text has the "Ctrl+1" shortcut. Simply change the number, and the items are going to be switched in an instant. (Ctrl+2, Ctrl+3, etc) Useful clipboard tool All in all, MagicCopyPaster is a handy app that can help you switch between clipboard elements in a quick and easy way. It allows for clipboard editing and sport ten hotkeys that prove to be real time-

Keymacro is an app that allows you to access your keyboard with a voice. This is a very useful feature for those who cannot use a mouse or have physical problems that keep them away from it. It is also suitable for those who simply like to use the keyboard when they work with a computer. Moreover, it can also help you save time by automatically performing repetitive tasks. A simple app with a simple interface There are only three options in the main window: "Voice Input", "Task List" and "Other". The "Voice Input" option can be changed by scrolling with the wheel or hitting the "Hotkey" button. The "Task List" is a window that keeps all of your actions in a clear and neat list. "Other" is a section that can hold several options. If you find a phrase you want to add to the voice list, simply hit "Find/Replace" and start recording the phrase that you wish to use. No more phrases to memorize, simply speak! In the "Task List" window, there are a series of buttons that contain the list of phrases you have previously recorded. If you want to add a new phrase, simply hit the "Add" button. The list will be cleared and you can start recording the new phrase. "Repeat" button will keep on repeating the last recorded command. It is good for adding multiple phrases. For example, you can use it to tell your computer to open many files. After a command is recorded, it is added in the "Task List" and is now ready to be played back. Simply hit the "Play" button, and you will be able to speak the recorded phrase. If you want, you can still edit the recording, in case something went wrong. The whole process is very simple, and it works well on a lot of operating systems. Keymacro is a useful app that allows you to use your computer with a voice. It works very well on Windows and Linux systems. The interface is not complicated, so it can be used by everyone. It is not the fastest app, but if you are an expert user, you might find it a useful tool. Keymacro Shortcuts: ** Windows / Linux Mute all commands F3 Capture the last command Shift+F3 Clear the list of commands Ctrl+Shift+F3 List of commands Ctrl+Shift+F3+A Add a command Ctrl+Shift+F 1d6a3396d6
