Roxio Portable Voralent ROMEO is a standalone photo resizer and image converter program, enabling you to modify the width and height of your favorite pictures, while also providing you with conversion functions. Thursday, October 12, 2016 (CCMMT) It is estimated that, around the world, more than 200 billion photographs have been taken, according to the latest report by Digital Imaging Industry Association (DIIA). Not to mention the number of photographs taken at each and every event or celebration. "The number of photographs taken is truly amazing. We also cannot forget the fact that each photo can include one or several pictures. We are told that a picture is worth a thousand words but I am convinced that each picture has much more worth than that. Photographs not only help us remember special events or times and people but, more importantly, help us remember the things that we have accomplished. Therefore, it would not be incorrect to say that we, as a human race, have the tendency to take and save more pictures," says Winky Alcasid, owner of Scenery Images, a famous and reliable photo printing company based in Tagaytay City. Scenery Images is known as one of the leading picture printing companies in the Philippines and it is also known for its quality and modern printing techniques. Scenery Images is the preferred choice for the people who want to have their own prints and enlargements of the photographs they took. Winky adds that photographs bring out the best in people. "For example, we look forward to a get together or a party with our friends and relatives, just because the occasion promises a lot of fun and adventure. We really enjoy the experience and we look forward to more fun days in the future. The same thing goes to events of a different kind. We wish to share our moments with our friends and relatives by taking pictures at

the said events. Scenery Images, on the other hand, tries to enhance the photos we have in our collection. We want to take them out of the can and give them a new look. We want to recreate it and have another version of them," the company's owner says. Winky says that he does not just try to please his clients. "In fact, I go the extra mile to give my clients the best service that is worth their investment, and most importantly, my clients' satisfaction," says Winky. Winky is one of the biggest names
