Settle it on an all-new aircraft with this complex and fun resource management game for the PC. Explore a sky filled with hungry ravens, hungry foxes, and

---

just plain hungry birds, and let the best sky animal feeder in town do the flying. Bird Boss is a cooperative, tower-defending game where the player leads the winged avian defenders and attempts to rescue all the trapped birds

What's New in the?

SuperMailer allows you to send e-mails to multiple recipients at once, in a simple and straightforward manner. It takes advantage of a large collection of pre-designed templates that can be downloaded from the application itself, which allow you to quickly create your personal e-mails, without having to worry about writing one from scratch. The

---

program is packed with numerous features and options, allowing you to create an e-mail message from scratch or edit your previously created message, and even send it directly to your contact list.

Main Features:

1. E-mail templates:
  - a. Multi-format compatible: You can now save e-mails using various popular HTML formats, such as HTML, MHTML, XHTML, HTML-M and HTML-X, in order to enable you to include background images, symbols, symbols, graphics and other elements, in the e-mails that you will send to your customers.
  - b. Powerful editor: SuperMailer comes with a comprehensive and powerful text editor, with a large number of tools and options that allow you to make any type of

---

changes to your messages, such as editing font size and type, changing your background and adding complex tables. c. Simple editor: You can edit your text directly through a text editor that provides the flexibility to add any character or character sequence to your text. 2.

Multiple sending modes: You can choose to send the e-mails to a single recipient or a group of recipients at once, using the default address book or any other file that you have. 3. Content customization: With SuperMailer, you can now create and edit your e-mails from scratch, customizing each element of the message, such as text, photo and so on. 4. Multiple sending lists: You can select a specific group of contacts from the address book and send

---

them e-mails according to your desires, with the ability to send personalized messages to each recipient, without having to worry about adding recipients manually.

5. Added e-mail capabilities: SuperMailer integrates with the added e-mail functions of several applications and services, such as Yahoo! Mail, Gmail, Hotmail, AOL, etc. You can now send e-mails to multiple recipients without the hassle of managing multiple accounts, or sending an e-mail to one account, and later changing it to another, as SuperMailer will support all these functions at once.

6. Multiple formats: You can select the desired format of your e-mail message, such as HTML, MHTML, XHTML, HTML-M, or even

---

HTML-X, in order to have a customized appearance for each recipient. 7. Showing your message previews: With the feature of showing your e-mail previews, you can see the exact form that your e-mail message will be displayed to the recipients of your mailing lists. 8.
