CoolWeb is a very powerful and easy-to-use website creation tool. CoolWeb will enable you to build professional-looking websites within minutes, you do not even require to be online for it. No need of going through confusing website creation sites and get poor results. With support for templates, CoolWeb is powerful enough to create different modern-looking websites for you. It includes 10 outstanding templates with compact code and more templates can be added quite easily. The included templates are designed by respective users of OSWD (www.oswd.org). Please take some time to visit OSWD and the websites of authors of the templates. Aside from templates, CoolWeb also focuses on time taken to build a site. It will take about only 10 minutes to create your ready-to-publish website. By using the term "ready-to-publish", I mean that if you designed your website the way you want in CoolWeb, you do not need to make any changes in order to publish it on the web. Just build and publish! With CoolWeb, creating websites is truly visual. Select templates visually, add and delete pages visually and format your text visually. If you are in a little hurry, and do not have time to write text for your website, CoolWeb also includes some predefined-pages for you. It couldn't have been easier than that! More predefined-pages can be added easily, just drop them in the "pages" folder. It couldn't have been easier than that! More predefined-pages can be added
