History AutoCAD is an abbreviation for Autocad, which was originally developed by the Autodesk Company. It is the most widely used CAD software application in the world. The first version of AutoCAD was first released in December 1982 on Apple Macintosh computers as the first desktop CAD software application and was originally called AutoDraw.

AutoCAD is the official name of the application. In the early 1980s, AutoCAD's graphical user interface (GUI) was virtually identical to that of most other mainstream desktop graphics programs. AutoCAD's interface was initially designed to be displayed in the landscape position, similar to the interface of many other graphic programs. Later, AutoCAD was developed to be more like many other graphic programs. In 1986, the user interface of AutoCAD was redesigned to be more compatible with other CAD software applications. The first version of AutoCAD on a personal computer was released in 1988 and was called AutoCAD LT. It was first released for the

Category:2015 software Written by Charles Davis The Press-Register The Alabama Department of Public Health has completed its work to remediate most of the lead problems found at hospitals and health-care providers in the Birmingham area.

---

Director of Public Health Jeff Alford said the department has completed its investigation of 26 health-care facilities, including six hospitals and 20 nursing homes, and has completed the removal of lead dust and paint chips from the rest of the facilities. “We have not finished with our work and will continue to work with health-care providers, but our results show that these issues have been addressed and we feel comfortable that this is something we can move forward with,” he said. Fifty-seven samples were sent to the national reference laboratory at the Centers for Disease Control and Prevention. About 20 percent of the samples contained lead. The highest number of lead-contaminated samples came from health-care facilities in Birmingham. One sample from the University of Alabama at Birmingham Medical Center came back positive. The state’s largest health-care provider, UAB Hospital, has been the most aggressive in addressing the problem, Alford said. “UAB Hospital has been proactive in their response,” he said. In addition to UAB Hospital, the other facilities that had the most lead samples were: Birmingham-Southern College, UAB Bragg Medical Center, Parkview Hospital, Children’s of Alabama, Hillcrest Baptist Medical Center and Southern Hills Hospital. The samples were taken by hospital staff, and tests for lead were done by the state. Alford said the a1d647c40b
