A: This is called a non-free version of the software. I understand you want to use the full functionality of the software, but in doing so you are being offered a trial of the software, which expires at some point unless you renew your licence. The stock for the developing sector is set to rise. The products and services provided by this remarkable technology are still in their infancy. While the technology's efficiency promises to revolutionize the market over the coming years, many people wonder about the exact functionality of the blockchain and smart contracts market.
