What's New in the?

Free MP3 Sound Recorder is a fast and easy to use sound recording application, designed to record the sounds coming from any device or device driver, from any sound card, from any sound source: from a line-in, from a microphone, from an audio CD or from an internet radio stream. MP3 Sound Recorder allows you to record audio and to save the files in a number of formats, including MP3, WAV, WMA, OGG, VOX, RAW, WAV and DSP, each of these formats having its own set of configuration parameters. Let's start with the sound recording. It's easy to set up Free MP3 Sound Recorder: simply select the recording source, input device and, optionally, output device and press the record button. The application will then ask you for some options: the bitrate and the sample rate will be selected, if any, while the number of channels will be defined automatically. In order to have a quick preview, the volume will be set to zero. And now, Free MP3 Sound Recorder will record the sound. MP3 Sound Recorder allows you to save the recording to MP3, WAV, OGG, VOX, RAW, WAV and DSP, each of these formats having its own settings. Let's now look at the main window, where you will find some buttons at the top of the window, including a menu bar and a toolbar. On the menu

bar, you will find some buttons, including Save, Play, Stop, Next and Previous, while the toolbar has some buttons, including Start/Stop Recording, Playback Control, Record Cancel, Play/Pause, and the usual Search and Options buttons. Click on the Play button and you will hear the playback of the previously saved recording. Double-click on the Stop button to stop the recording. Click on the Playback button to activate the playback of the currently recorded file. To save the file, click on the Save button. To delete the recording, click on the Cancel button. The recorder will be automatically stopped. The Main window of Free MP3 Sound Recorder At this point, Free MP3 Sound Recorder has been installed and launched on your computer, but the next step is to configure the recording options. This step requires to define your recording options: bitrate, sample rate and channels, and you will also need to define the recording format. The first set of options refers to the recording bitrate and sample rate: the more you set them, the higher the quality of your recording, at the cost of file size. In the default case, the application will record in 32Kbps and 44.1Khz, while if you choose to record in 32Kbps and 48Khz, the file size will
