Cool Movie Browser is an easy to use movie player. This software program is designed to scan your computer and automatically add all video files found in the movie player directly into a categorized movie database. And when you want to, you can change the playback rate of the video file, set a default player for each file extension type and the list can even be sorted by genre and year. Everyone knows that the sorting and searching functions of this program can provide a lot of fun, but what else could this utility do that we haven't mentioned? Well, there is a lot of it, and Cool Movie Browser gets an A for usability. The interface is organized logically and it is also possible to customise its appearance to make the application look and work the way you want it to. In addition, several sections are offered that allow you to manage your video content, like the category, description, length, metadata and ratings of your files. The search function can also be used to find videos based on any metadata attributes, titles, actors and directors or any other information. The Movie Scanners category has been redesigned a few times since the program was released and there is still much room for improvement. However, the ability to create custom categories and to set criteria for some of the video properties are two must-have features. There are actually several ways to import your videos into the Cool Movie Browser library. You can access this option from the 'Catalog' menu. Apart from the 'Import from File' function that is present by default, you can also import files by copying them to a local folder or by connecting to the online video sharing websites. There is a built-in browser for this purpose, so that you can easily find all the supported video sharing services. So what's all the fuss about? Well, this application is a dedicated and complete video player that also acts as a powerful library. For anyone who wants to sort, organise and search his or her video content, Cool Movie Browser will prove to be a very useful tool. ' Description: Cool Movie Browser is an easy to use movie player. This software program is designed to scan your computer and automatically add all video files found in the movie player directly into a categorized movie database. And when you want to, you can change the playback rate of the video file, set a default player for each file extension type and the list can even be sorted by genre and year. Last updated on. From the section Scottish Premiership Forfar Athletic manager Rob Thomson celebrated the return of playmakers Ross Forbes and Matty Kennedy at Forfar's first home match in five years. Forbes' controlled finish off a pass from Kennedy earned Forfar a deserved point on a frustrating afternoon. Goalless for the first 30 minutes, following a 10-minute hiatus for a "long-term injury" to George Carmody, Forfar made a bright start. The hosts' first chance fell to Kennedy and he had a shot cleared off the line by Cameron Nicol. Forbes wasted another good chance when the ball broke to him but was caught offside. Reds-into-the-bushes There was more promise with just five minutes gone, as Kennedy fed Forbes down the right and his cross was turned behind for a corner. On 14 minutes, youngster Mairi Markram lost his footing and skied the ball over the crossbar, leading to a goal kick. Seedorf, making his first start for the Forfar since leaving in June, had a fine long-range shot tipped over by youngster Christie Gordon. The goal-scoring chances flowed away from Forfar as Darren O'Dea's cross was headed behind for a goal-kick by Markram. They began to settle down, and Forbes curled a header just wide and Neil
