SmartSystemMenu is a utility designed to help you simplify the window management operation on your desktop. With the help of Windows, you can resize, minimize, maximize, close and so on your windows, but many times it's not as easy as you would expect. They run all the time, in the background, and they can leave traces in system registry or in start menu, sometimes resulting to user preferences changes like defaults, add/remove programs, links to your shortcuts, user profile settings, and so on. That is why SmartSystemMenu comes to help, supporting easy access to Windows functionality, since it's not as easy to find and use with default operating system, and the most important is, it does not leave traces of what it does, that is it does not change system registry, start menu, or any other system related settings. SmartSystemMenu has almost everything the default operating system window management has with the exception of automation. The advantage of it, is that it gives you a visual feedback of what actions it does and what it does not, like minimize, maximize, close, load in the taskbar, move to tray area and more. SmartSystemMenu Features: User friendly interface You can move windows to top Window colors can be changed Minimize windows in the tray area Showing the status of windows (maximized/normal/minimized) Adjusting window order (order by position, order by name, order by class, order by size) SmartSystemMenu Details Regular price: $15.95 Instant download! RAR Archive Click here to reach the system requirements page. For your convenience, we have uploaded all the files in your only one download folder. Important: During this process, other applications are not in use, so you don't have to worry about data loss. The software will run in the background and will not interfere with your Internet traffic. It is extremely efficient in use. We have tested our software on Windows XP, Vista and Windows 7. It should, however, not interfere with the normal operation of your computer. If you experience any problems, try a different download folder or use BitTorrent to download. Proceed to the download page and download as you wish. Important notice: Once you purchase the software, you will get an email from us with the download b7e8fdf5c8
