YunOS Android 4.4 and 4.3 ROMs from kaller / 3G tablet chinese manufacturers.Q: Dual I2C connection on Atmel Studio I am beginner using Atmel Studio 6.1 and trying to implement a Dual I2C bus on Atmel AT91SAM5 device, and encountered some problems. I have bought Atmel "AT91SAM5AN" IC and PCB to try it out, and the IC that I use for experimentation is highlighted in red color in the picture. I put them on the dual I2C bus, with GND as ground, and SDA to SDA0 and SCL to SCL0 on the board, and there is a LED.I expected that when I have a value of SDA1 (leftmost pin), the LED will be ON and when I have a value of SDA0 (middle pin), LED will be OFF. The problem that I encounter is that the LED is ON and OFF, no matter what I input to the SDA pin. Please see the picture below: I am not sure if I am doing it right. My PCB has SDA0 to SDA1 and SCL0 to SCL1. I am using a single SDA and SCL to control two ICs. There is a board like this in the picture. Update: There is a disclaimer on Atmel's website that says: Some pin assignments may be changed or not compatible for different applications. Refer to the board and PCM technical data for details. I have no intention to use the device in different applications, hence the pin assignment is not an issue. They have mentioned it in this image and there are 6

What you see in above video is the process of flashing of new Leagoo Leapad 10 Firmware [MT8321].Q: Find the analytical solution of the form  $e^{-x} + 1 + \tan(x) + \tan^2(x)$  using series approximation The question is: Find the analytical solution of the form  $e^{-x} + 1 + \tan(x) + \tan^2(x)$  using series approximation. There's a hint, but I am clueless about what series approximation is all about. Also, if there's a way to make this question more accessible in terms of concepts and not technical definitions, that would be appreciated. Thanks in advance. A: I guess it is the expansion of  $\frac{1}{\cos(x)} + 1 + \tan(x) + \tan^2(x)$  in a power series of  $\cos(x)$  d0c515b9f4

The latest version of Leagoo Leapad 10 9003X MT6580 Firmware is here. · Official Leagoo Leapad 10 (K960 MediaTek MT8321) Stock Rom · Japanese Surgeon Japanese Surgeon is a 1938 American war film directed by William Nigh and starring Virginia Weidler, Ken Maynard and Roger Pryor. It was made by Republic Pictures. The film was distributed by Monogram Pictures, and it was one of several films in the giant monster genre made by Republic during 1938. Plot summary During an outbreak of bubonic plague, a Japanese surgeon (J. Carrol Naish) hides in a cave to flee an avalanche of plague. When a search party

---

goes to find him, they find a woman (Virginia Weidler) tied up and the cave ransacked. Soon after, a cave-in traps them inside and they almost suffocate, only to be rescued by the surgeon. When the avalanche stops, the searchers find the cave remains intact and has been cleansed of the plague. The man leaves, intending to stay in the mountains to avoid plague contagion. The woman's sense of guilt over the helpless man who needs her life-saving medicine prompts her to follow him into the mountains. She is saved from a bandit attack by the surgeon. When they encounter a group of Japanese soldier searching for the fugitive, the surgeon and the woman hide until dark and then go for help. The surgeon plans to take the woman to his village, where she can recover from her injuries, but the soldiers take her prisoner along with the two other survivors. The three captives find their way to a Japanese army headquarters, where the soldiers find a grave with a headstone engraved "On the Shoulders of Giants." The army surgeon recognizes it as the inscription of a Japanese general, and learns from the

---

POWs that he is the surgeon who hid in the cave in the outbreak of the plague. Upon learning this, the army surgeons are horrified at the prospect that the Surgeon has become a monstrous and evil monster. To prevent the Surgeon from murdering the captives, the soldiers hold him at gunpoint while the cavalry arrive. It is in the midst of this that the Surgeon murders the cavalry officers. The army surgeons inform the commanding officer of the General's identity and request him to take the Surgeon to the mountains to seek revenge. The General agrees, knowing the Surgeon will be unable

RK Kniž Rukometni klub Kniž (abbr. RK Kniž, Serbian Cyrillic: РукoмeтнИ клуб Книј) is a handball club from Serbia. The club was formed in 1965, making it one of the oldest handball clubs in the world. They play their home matches at the Šumice Stadium in Zenica. Their colours are red and white.

Honours In the 2009–10 season the club from Zenica finished third in the Serbian First League of Handball and qualified for the playoff round of the EHF Champions League. In the playoff the club defeated Hungarian Bp. Balmazújváros in the first round and Norwegian Haugar in the second round. In the quarterfinals the team eventually lost against EHF Cup winners Viborg HK.
