of the image, you can use one of the above methods to place the image in the top layer, make a selection (which I assume you know how to do), and then paste in the text. A: The program Gimp is able to edit an image using ASCII art. This example below was done in Gimp. A: If you have some text you want to overlay, place it in a new layer below the top layer (top layer is always white) and go to filter>distort>spherize From there you can choose an angle and curv
