In game design, game rules are often drawn using hand-drawn diagrams like the one in this game. Is there a term for hand-drawn diagrams? I do not refer to some nice UI library which is being used here. I am curious because I do not like all the terms I found in the internet. I am searching for a description that narrows down to a term. A: I think you are looking for a Graphic designer. There are too many buzzwords out there so be specific, and very clear. Its not a game designer or a UI designer, its a graphic designer. A: The answer to your question is precisely another term, one of the many terms games employ to describe visual aspects of the game such as models, characters, textures, colors, backgrounds, fonts, etc. How do they do that? A game is a set of rules applied by players. To play the game, the players follow the game rules and usually interact by using game pieces, cards or coins. Each game piece, card or coin is derived from the game rules and the visual aspects of the game. A game designer and a game artist do the work to produce the components of the game. See Wikipedia game components Game developers and game artists and game designers may have artistic and creative values, and are paid to produce the game. In turn, the developer and the artist are paid to produce an end result which conforms to the game and what the designers want. They have to produce the components of the game. Each component is designed, developed and produced differently. For example, A game character may be: Design by a 3D modeler, and the modeler creates a 3D model. Design by a 2D designer, and the designer may do in a different way from the 3D modeler. Design by a 1cdb36666d
