December 6, 2011 By: Ben Cooper For: Home Audio Video Systems (R.G. Gupta). Interview With Bill Gupton, President Of PowerHouse Video Products :.Q: Modulus operator and concatenation in SQL Server I am trying to do a specific query using Modulus operator (without using/creating a function). I'm using SQL Server 2017. Some basic facts: Fruits table have some fruit_name column. Fruit name length can be anything(6 letter,8 letter,12 letter) Here is the query: SELECT COUNT(*) FROM Fruits WHERE Fruit_Name % 2 = 0 The result is working fine. So, I added more rows in Fruits table with fruit names like "apple" etc. When I run the query I'm getting an error, the error: The operator '+' is not defined for types 'char, varchar, & sysname' and 'int'. How can I solve this problem? A: I think it is because: SELECT COUNT(*) FROM Fruits WHERE Fruit_Name % 2 = 0 If you remove the addition operation, this query will work fine. // Copyright 2011 Mark Cavage All rights reserved. // If you have no idea what ASN.1 or BER is, see this: // ftp://ftp.rsa.com/pub/pkcs/ascii/layman.asc var Ber = require('./ber/index'); //--- Exported API module.exports = { Ber: Ber, BerReader: Ber.Reader,
