A typical city's car fleet produces 250.000 tonnes of NMOCs each year. Due to local and global warming concerns,

the use of fossil fuels is facing strict regulations to cut back on emissions, fuel consumption and noise. In the near future, light commercial vehicles (LCV) are likely to replace conventional ones. The question is how to regulate and facilitate LCV flow and therefore, emissions and traffic congestion. published: 04 Jan 2017 Traffic Lights Animation published: 27 Mar 2017 Why I Only Use RCTE published: 20 Dec 2016 Traffic lights simulation published: 23 Mar 2017
