"Since the introduction of its real-player motion capture in FIFA 19, we've been listening to fans' feedback on the realism of their interactions with virtual players and have worked to ensure that on-ball actions are more challenging and less predictable. We've made the ball feel more responsive, propelling it with more power and better accuracy during on-ball interactions. Similarly, interactions in actual matches between two real players are not always as perfect as they appear on screen," said Andreas Seybold, game director. "You might occasionally experience moments during gameplay where the ball looks like it goes through players' legs or even going out of bounds. We've enabled more realistic ball behaviour and physics around those actions to more accurately reflect the unpredictability of real world collisions and movements." At its 2015 Sport Video Game Awards show (SVGA), EA was presented with the Game of the Year award by Sports Games Alliance, the industry association that celebrates the game industry's efforts to broaden sports gaming. Additional Features of FIFA 22 The ball experience is greatly enhanced in this year's FIFA Ultimate Team game mode, FUT Champions, which is being released simultaneously with the main title. "Getting control of the ball in Champions, especially in attacks, is a game-changing experience," said Antonia Nelli, game director. "The challenge level is just higher." The FIFA Ultimate Team card packs gain even more visual diversity in this year's edition, with more than 500 cards exclusive to FUT Champions. The condensed graphic quality of these cards is optimized for FUT Champions, and a new set of cards are available for purchase in the in-game store. The entire 2018 FIFA World Cup™ archive was re-released in this year's edition of FIFA Ultimate Team, allowing players to create teams and players based on the World Cup and season's completed matches in the 2018 FIFA World Cup™. As a result, four seasons of matches were added to the game. In FUT Champions, the AI has been upgraded to improve the play-style of each team, and improved computer skill levels were introduced to coincide with the implementation of a new goalkeepers' save system. FIFA 22 also introduces FIFA Passport, a system that allows players to collect and complete the entire 2018 FIFA World Cup™. FIFA Passport
