FIFA 22 brings advancements to every aspect of the game, including its player, management and gameplay modes. And in addition to FIFA Ultimate Team, the FIFA 21 Ultimate Team experience has been completely overhauled. FIFA Ultimate Team is bigger than ever with more than 300 cards added as a result of the latest collection cycle. You can also start collecting all-new cards, with FIFA Ultimate Team bringing back the card packs system, allowing you to purchase packs to boost your collection, and with the player cards being added to the packs, it's never been easier to expand your squad and compete at the highest level. FIFA Ultimate Team rewards and progress will also benefit from the new cards. The FUT Outstanding Player badge and player card will be unlocked for players with cards at the more valuable end of the spectrum. The FIFA Team and badge will be earned for the FIFA Team, with the FIFA Ultimate Team Pro badge for players with the most prestigious team. FIFA 22 is out now for PlayStation 4 and Xbox One. NEW in FIFA 22: "HyperMotion Technology" - the game engine now brings 100% immersion to the soccer action. Players run and cut on the ball during the match. More players can run with the ball and will feel the impact of collisions. Players' acceleration, speed, sprint, first touch and game speed changes are greatly impacted by this. Players can predict what the opponents are going to do and anticipate their opponents' moves. The collision system in FIFA 18 is too fragile and could not capture the reality of a large, heavy player impacting a light player. Player runs affect the animation of their shoulders, torso, legs, hips, ankles, feet and calves. Players can see through the vision indicator and it is possible to see the movements of players on their opponent's team in the replay mode. New Personal Facing Options - which position a player when creating a player vs. player game, or when you are pressing a button to create a friendly play, or when you are ready to play a game with a friend or online. You can also find the new Manager AI settings in this new feature.
