images you work on. These are the tools that we
use day to day. Selecting tools: Fingers Mouse
Using the mouse: Click and drag to select objects
Click to select multiple objects Click to select an
area of the image Click to deselect an object CTRL
While the mouse is held down, click with it to
select objects Using the keyboard: The first
method we'll look at is using the keyboard. There
are two ways to select objects. With SHIFT held

With SHIFT, press the number keys (0-9) to move
the cursor Once you've placed the mouse pointer
over an object you want to select, press the
number keys to move the cursor. Then, use the
left and right arrow keys to select objects and the
number keys again to select an area of the image.
You can use the mouse and keyboard to navigate
the image in the same way. Lines and curves:
Using the Line and Curve tools will allow you to
select objects or areas of an image. These tools
are the same except the Line tools use a line to
select objects and a curve to select an area of the
image. Lines and curves allow you to use the

arrow keys to move, or the number keys to move the cursor. Reshaping the selection: The Line and Curve tools create a selection, or shape, that can be easily changed. You can resize the selection by pressing CTRL +. This adds a tick on the right side of the mouse. Use the right arrow to move the cursor right and the left arrow to move the cursor left. You can also rotate and flip the selection by holding down the ALT key while dragging with the mouse. Removing objects: You can remove objects from 388ed7b0c7

"Are you insane?" "Bobby!" "OK, Fine." "Let's go to the mall." "We'll go to the mall, we'll look for a boat." "Susan, don't you get it?" "We are so fucked." "Why are we here?" "Why did we even fight to live?" "We are so fucked, I'm telling you." "Why did we even try to live?" "We're all going to die." "Bobby, look at me." "I'm not going anywhere without you."
