Local businesses fare well at Shoprite supermarket Bermuda businesses as a whole had a very good year, according to figures released by the National Statistics Office, but two regional centres had some of the best times. The biggest of these was Hamilton, where businesses had a December to June average growth of 21.4 per cent, compared to the national average of 0.8 per cent. "Bermuda is a small economy, so it is no surprise that most businesses are fairly modest in size and therefore this growth is particularly remarkable," the chief executive of the Small Business Development Centre, Peter Hayden, said, noting that Hamilton was the second largest business in the country. He also highlighted that Hamilton's year-on-year growth over the past four years has been higher than the national average. "However, the long-term trend is still very positive," he added. "Hamilton's vibrant community is reflected in the diversity of the types of businesses in the region as evidenced by the range of products and services offered." Hamilton was followed by St George's in the East at 20.9 per cent, which was also very high, and Warwick at 17.4 per cent. "We have been very successful in attracting more and more new businesses to the region," a representative from the government's Small Business Development Centre in St George's East said. "We have very proud local businesses that are supported by a strong supply base of regional businesses." What is 360884000 rounded to the nearest million?

I downloaded this version from What is the download link for this version of Recover My Files for Windows? I downloaded version 4.1 but it can't find the files I need. A: Download the trial version from Note the trial period. Click download. Install the trial. Optional Upgrade to the full version. After installation you can find the recovery software under the Start menu. Choose your installation dir. Go to the folder: Program Files. Inside the folder: ReconMyFiles "Designed to appeal to the hungry stomach, as well as the brain" Salmon is a rich source of protein, carbohydrates, lipids, vitamins and minerals. It is a great source of omega-3 fatty acids, B vitamins, including vitamin D, and the minerals calcium and phosphorus. Dietary intake of vitamin D is indispensable for bone health and calcium for regulating blood concentrations of calcium and phosphate. Salmon has a particularly high content of n-3 fatty acids, but also contains monounsaturated and saturated fatty acids. Salmon is a source of polyunsaturated fatty acids such as eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA). These fatty acids are essential for the healthy functioning of the body and brain, and the enzymes necessary for the synthesis of them are expressed when the body is exposed to adequate levels of these
