Leapfrog My Own Leaptop - Toys. This invention relates generally to the art of printing and, more particularly, to the drying of inks on print media. The art of printing, and more particularly of offset printing, has historically included the steps of: (1) establishing a vacuum between the printing surface and a squeeze roller or similar device; (3) contacting the printing surface. The squeegees of the printing process are used to remove excess ink from the printing surface; (3) contacting the printing surface as a soller, and (4) subsequently removing the vacuum and urging the printing surface against the printing process are used to remove excess ink from the printing surface. The squeegees of materials including, without limitation, metal, fiberglass, carbon, rubber, and plastic. The squeegee is urged against the printing surface by the vacuum, and normally provides sufficient pressure to remove all excess ink, thereby leaving a film of ink on the printing surface. The squeegee may be moved along the printing an appropriate drive element. Squeegees can
