3D Earth 2000 Patent Pending Create 3D Scenic Views from 2D Maps Are you a cartographer? Have you ever wished that there was a tool to allow you create and share your 3D map creations? Imagine being able to import an aerial picture of a region, and using a drop down menu to select the desired view. When you selected the right view, you could then save the view to your own 3D Maps database, use the map to create a 3D view, export to pdf, or even share the view on the internet. 3D Earth 2000 is a unique 3D Earth rendering tool that does exactly what it says on the box. You can use it to create the most realistic 3D renders of maps using an online map data base. The program has been coded by an independent developer from Australia, who lives and breathes maps. Is this software for you? If you like images and maps, and get excited over making new views of them, then you are a candidate. 3D Earth 2000 ships with a bunch of example maps that you can use to help understand the tool, but you can also add your own maps to the catalogue. Open source: License is Free, No ads Import and edit maps in many formats, such as Mapinfo, Google Earth, Google Tiles, QuickMapInfo, etc. Preview, Export, Import PDF, PostScript formats Includes utilities for resizing, rotating, inverting and mirroring maps. Automatically load external.kml,.kmz,.gpx and.topo maps. Insert and edit Overlay icons. Create 3D Scenic Views from 2D Maps Make your own 3D maps using the 3D Earth 2000. Just click on the shape of the region you want to view (using Google Earth to get a point to the center of the region on the map) and then select the top view you want to view. You can save the view to your own 3D Maps database. View and edit 3D maps using a 3D planetarium, or with a 2D Earth map. Add your own map data using.topo,.gpx and.kml files. Save or export to.ps,.pdf,.png,.svg formats Automatically load external.kml,.kmz,.gpx and.topo maps. Insert and edit Overlay icons.
