Goto Language tab, select English -> Other, and enter FR or DE and click ok. If everything went fine, the language will be set for all your Steam games that are in the settings for Settings->Game Settings->General. There are 2 important things to know to start using Steam in French: The language update in Steam must be done from the French version of Steam The game installer has to be in French to recognize your language settings, this is important for Steam files stored on your computer and not on Steam. Coming to 2, if you choose English as the language for your computer, Steam will download the language pack from the server. But if you choose French for your computer language, Steam will download the language pack from the server for FR in the steam client. If you run into issues after the installer, you can check where

Steam has put the prerequisites by examining your ~\Steam\userdata\. For example, if you are installing on Windows 8, do this: Open Windows Explorer Right-click on your Steam folder Select Properties Select the Security tab From the Edit menu, select Permissions Add a user account who can write to the folder For example, select "Everyone" on the folder "C:Steam". If you want to start over, you can remove your user account from the "Everyone" group, and then add a new user who is not in the "Everyone" group. Game Installer Language Problem - help My game says "not compatible with game installer" and it will still install the game but the installer says it is installed and so does my steam client. I have unchecked all boxes except one and it says Unknown Language. A: OK, it turns out that the Steam Content Changer had been disabled due to an unrelated problem with our internet connection. I went into Google Translate (the app I use to speak foreign languages into and out of English) and simply clicked "Start" to select French. After that, the game installed fine.
