Before I begin to impart the purpose of this module, I think it is important to give you a brief introduction to EA SPORTS™ FIFA. FIFA is the simulation game from EA SPORTS™ that allows you to play as yourself and master the art of simulation football. It is the game that will show you the style of football you play, by choosing your favourite team and taking to the pitch with your mates. The game consists of several modes: * The game includes a full suite of gameplay mechanics. These range from attacking/defending, passing, shooting, heading, dribbling, taking shots, scores, stamina, rating and special abilities. * There are also Virtual Reality (VR) and Augmented Reality (AR) modes for the game. If you are not using a PlayStation®VR (PS VR) headset, you can still create a virtual arena with the AR mode. * Once you have started a game, you will be able to create your own team, including customising their attribute for free. You can then compete in solo mode or head to the online Fifa 20 mode. * You will also be able to play as yourself or as your favourite player. Now, with that introduction out of the way, I will be showing you how to create your own player. How To Create a Player First, navigate to the FIFA Ultimate Team mode on your PlayStation®4. Here, you should be given a screen titled Manage my Players. Click on this to go to the Player Creator. In this screen, you will see three sections: Customise My Player, Import from the Community and Manage Players. Before we begin creating a player, I will first teach you how to import your own attributes into the Create a Player.
