Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children.

Roblox's Mission: Roblox is a service that allows users to create and download games created using code provided by Roblox.com, a site where users can create their own games and then upload them for free download. It consists of Roblox Studio, a self-service tool for creating and sharing games, and Roblox Live, which is a multiplayer gaming environment. With Roblox Studio, users can create games for various platforms (including Android, Chrome, Firefox, iOS, Mac, and Windows). With the RoboX editor, users can edit code that will run on an in-browser window that they can share. Roblox has never permitted users to make money on any of their games, but in 2016, they launched Robux, a virtual currency that can be exchanged for real money. In doing so, Roblox was the first company to introduce such a virtual currency. The purpose of the currency is to fund

game development and to make it possible to allow users to purchase virtual gifts from developers. Robux is the default currency for all Roblox games and is earned by playing games, uploading games, and buying some games. Games can be purchased either with in-game Robux or real money. The company has been notorious for its controversial moderation policies. Games can be removed if they violate the site's terms of service. There are few to no penalties for violating these rules, however. Roblox's content team typically deletes games
